FreshWay Board archive — C10 · Store property data

What the property file holds on the 120 stores, by group. Dock type, zero-emission zone and click & collect status per store are already in `stores.csv`; this card adds what sits behind those columns.

Ownership and lease. 28 stores are owned (11 XL, 17 standard) and 92 are leased. Leases end in 2027 for 8 stores, 2028-2030 for 29, 2031-2035 for 41 and after 2035 for 14. A lease runs ten years with five-year renewal options. Any change to the building at a leased store, such as a dock, a charger or a pick-up locker, needs the landlord's written consent; 31 of the 92 leases let the landlord refuse without giving a reason.

Dock type in `stores.csv`	Stores	In a ZE zone	Can a trailer reach the dock?	How the store is unloaded
trailer	100	2	yes, including a 66-cage double-deck trailer	at a dock with a leveller
rigid_only	14	14	no: the yard takes a rigid truck or a city trailer, not a double-deck combination	a double-deck trailer unloads in the street, by tail lift
street_level	6	6	no dock at all	from the street, by tail lift, through the shop's goods entrance

Zero-emission zones. The 22 ZE-zone stores are in Apeldoorn (7), Nijmegen (7), Zwolle (5), Arnhem, Enschede and Amersfoort (1 each). All twenty stores without a trailer dock are among them.

Unloading restrictions. On top of the windows in `stores.csv`, 37 stores in residential streets have a noise condition in their permit: quiet roll cages and no reversing alarm before 07:00.

Space for click & collect. 30 stores are pick-up points today: all 18 XL stores and 12 standard stores. 37 more standard stores have room for one, meaning at least 20 m² of free back room or a locker spot on their own car park; 4 of them are in a ZE zone, and 26 of the 37 are leased. The other 47 standard stores and the 6 City stores have no room.

> **Board archive card. Released only in answer to an Information Request.** Do not forward this card to another department; if they need it, they file their own request. Every request and every answer is

recorded in the Board Decision Log.

GenAI transparency. This card was written with Claude (Anthropic) by the course team, based on the FreshWay case design and a source-checked figure sheet. Figures that are not in the figure sheet were made up with the model to fit the case, and checked by the course team against the figure sheet and the datasets. Human-AI Agency Label: **Co-Creator**. Label source: Boetje, J., & Baake, G. (2026). *Nine prototypical human-AI agency patterns* [Figure]. figshare. https://doi.org/10.6084/m9.figshare.31706884 (CC BY 4.0).
