FreshWay Board archive — C06 · Promotions

Promotions are 22% of revenue. The published forecast accuracies (82% ambient and frozen, 87% fresh, at DC level per week) are measured outside the action periods below; this card has the other half. Period: October 2023 to September 2024, the twelve months before your dataset.

A weekly folder runs every week of the year with four mechanisms: price discount, bonus card, multibuy and bundle. On top of it come four action periods.

Period	Weeks	Main mechanism	Promotional share of revenue	DC forecast accuracy, ambient and frozen / fresh
Weekly folder only	the other 42 weeks	all four	19.5%	82% / 87%
Christmas	2023-W51 and W52	all four; meat, fish, cheese, drinks	38%	66% / 71%
Stock-up weeks	2024-W10 and W11	multibuy	34%	70% / 84%
Easter	2024-W12 and W13	bundle, price discount	31%	74% / 76%
Summer barbecue	2024-W25 to W28	price discount on meat and drinks	27%	79% / 78%
Year	*52 weeks*		*22%*	

Forecast accuracy at store level is five points below DC level in every period.

Uplift achieved, as units sold against the same store, product group and weekday without a promotion, in folder weeks: price discount +95% · bonus card +105% · bundle +110% · multibuy +115%. In the Christmas weeks every mechanism ran higher, between +120% and +150%.

Shrink from promotional over-ordering has never been measured. The KPI "shrink attributable to over-ordering" exists, but there is no agreed method, and the promotional part has never been separated from the rest. The Board cannot give you a number it does not have.

The thirteen weeks in your dataset are not on this card. Measure them. Still to be set: how shrink is attributed to a promotion, and who signs off on that method.

> **Board archive card. Released only in answer to an Information Request.** Do not forward this card to another department; if they need it, they file their own request. Every request and every answer is recorded in the Board Decision Log.

> **GenAI transparency.** This card was written with Claude (Anthropic) by the course team, based on the FreshWay case design and a source-checked figure sheet. Figures that are not in the figure sheet were made up with the model to fit the case, and checked by the course team against the figure sheet and the datasets. Human-AI Agency Label: **Co-Creator**. Label source: Boetje, J., & Baake, G. (2026). *Nine prototypical human-AI agency patterns* [Figure]. figshare. https://doi.org/10.6084/m9.figshare.31706884 (CC BY 4.0).
