FreshWay glossary — twenty words

Smart Logistics (EDSLOG.24) · one page · available from lesson 1

You do not need a logistics background for this course. You do need about twenty words: they are on every slide, in every FreshWay document, and in the column names of your data. English first, Dutch after it, because you will hear both.

#	English · Dutch	At FreshWay
1	**DC** · distributiecentrum	Warehouse where goods are received, stored and sent on to stores. FreshWay has a central one (**CDC**, Apeldoorn) and two regional ones (**RDC**, Zwolle and Nijmegen).
2	**EFC · hub**	The **EFC** picks online orders for consumers; a **hub** is the local site where those orders go into a delivery van. One EFC, five hubs.
3	**Case** · colli	One box or tray of a product. FreshWay ships ~311,000 cases to its stores a day. Nobody counts single yoghurts here.
4	**Roll container** · rolcontainer	Metal cage on wheels, ~50 cases. The standard unit of a store delivery.
5	**Pallet** · pallet	Wooden platform for stacking. Used supplier → DC; DC → store is roll containers.
6	**Order picking** · orderverzamelen	Collecting the items of one order from their storage locations. The most labour-intensive activity in a DC.
7	**Pick line** · pickregel	One line on a picking list: this product, this quantity, this location. Picking volume is counted in lines, not orders.
8	**Inbound · outbound**	Inbound = supplier → DC. Outbound = DC → store. Two different departments here.
9	**Replenishment** · winkelbelevering	Restocking the stores from the DC, mostly at night and early morning.
10	**Temperature zone** · temperatuurzone	**ambient** (room), **chilled** (~2–7 °C), **frozen** (~−18 °C). Almost every file has a `temp_zone` column; an average across all three usually hides the problem.
11	**Dock door** · laaddeur	Door where a truck is loaded or unloaded. A DC has a fixed number, so it can be a bottleneck.
12	**Delivery slot** · bezorgvenster	The time window a customer picks, e.g. 18:00–20:00. E-commerce sells slots; Delivery has to drive them.
13	**Cut-off** · besteldeadline	Last moment to order for a given slot or delivery. After it, the plan is fixed.
14	**Lead time** · doorlooptijd	Time between ordering and receiving. Long lead time forces more stock.
15	**Fill rate** · servicegraad	Share of what was ordered that is actually delivered. 97% = 3 in 100 units did not arrive.
16	**On time** · op tijd	Delivered inside the agreed window. **Always check how the column was calculated** — that definition is a decision, not a measurement.
17	**Forecast · forecast error** · vraagvoorspelling, voorspelfout	What you expect to sell, and the gap with what you sold. Everything planned in advance runs on a forecast.
18	**Shrink** · derving	Goods lost before sale: expired, damaged, stolen. In fresh food, a large cost.
19	**Click & collect** · afhalen	Ordered online, picked up by the customer. ~18% of FreshWay's online orders, and never driven anywhere.
20	**KPI** · stuurgetal	The few numbers a department steers on. Yours are named in your department file. A KPI without a definition and an owner is just a number.

If you remember only five: case · pick line · temperature zone · delivery slot · fill rate.

Where to look further. Column meanings: the `data_dictionary.csv` next to every dataset. Traps in the data: the *Dataset guide*. The company in numbers: the *Company dossier*. Say so in class if a word is missing — this page is meant to stay short, and it can be corrected.

> **GenAI transparency.** This glossary was written with Claude (Anthropic) as part of the FreshWay case design: selecting the twenty words from the course slides, the department files and the dataset columns, and writing the definitions in plain English. Figures were taken from the FreshWay figure sheet, not generated. Human-AI Agency Label: **Co-Creator**. Label source: Boetje, J., & Baake, G. (2026). *Nine prototypical human-AI agency patterns* [Figure]. figshare. https://doi.org/10.6084/m9.figshare.31706884 (CC BY 4.0).
